

## **USE OF CONFIDENTIAL MATCH INFORMATION BY PARTICIPATING PROGRAMS OR THEIR FACULTY**

Protection of confidential information provided by applicants for residency or fellowship training utilizing the SFMatch is a fiduciary responsibility of AUPO. SFMatch and AUPO have ownership and are the sole custodians of these data. A variety of reports comprised of pooled and de-identified data are routinely provided to programs and applicants to facilitate transparency in the match process. All of these reports may be used by the public without permission or attribution.

Participating training programs are provided with access to identifiable confidential personal information on candidates for the sole intent of matching applicants to training programs. These data may not be utilized, whether identifiable or not, by programs, institutions, or individuals for any other purposes, including, but not limited to, data analysis, research, and publication without express permission from AUPO in consultation from SFMatch.

Faculty from participating programs may request access to SFMatch data for specific research protocols that are submitted to, and approved by, the AUPO Data Resource Committee. Data for approved research must be provided directly from files provided by SFMatch. All published or reported research utilizing datasets provided by SFMatch at the direction of the AUPO Data Resource Committee shall acknowledge both SFMatch and AUPO as author or non-author contributors, as appropriate.

Use of data residing on training program portals or internally derived databases for any purposes other than an ongoing current match cycle is prohibited. Programs whose faculty are in violation of this policy are subject to disciplinary action that may include suspension or expulsion from SFMatch.
