2015 ANNUAL MEETING

JANUARY 28-31
JW MARRIOTT STARR PASS HOTEL
TUCSON, ARIZONA

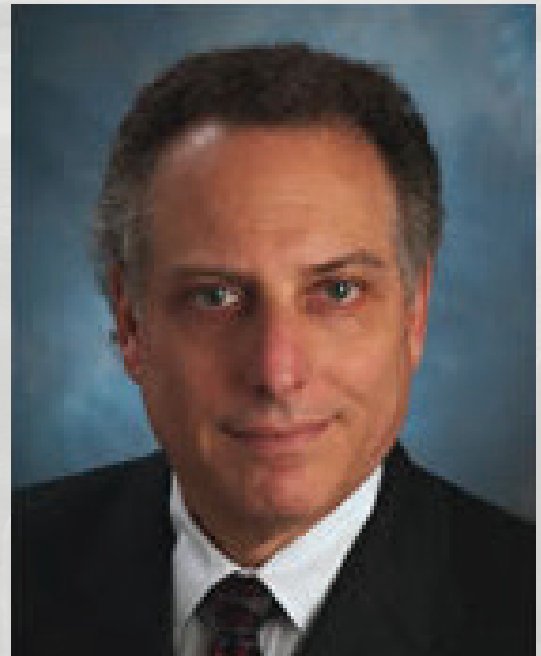

ASSOCIATION OF UNIVERSITY PROFESSORS OF OPHTHALMOLOGY
49th Annual Meeting Program

EVP Transition

We thank Bartly J. Mondino, MD for his ten years of service (2005 – 2014) as AUPO's Executive Vice President!

And, we welcome Steven E. Feldon, MD, MBA as the new Executive Vice President of AUPO as of January 1, 2015.

Welcome to AUPO 2015

Welcome to the annual meeting of the Association of University Professors of Ophthalmology being held January 28 – January 31, 2015, in Tucson, Arizona. This year, the AUPO Board of Trustees and Executive Vice President, in conjunction with the associate leadership, have developed a timely and relevant program addressing the key academic missions of education, research, and patient care. Education is the backbone of AUPO; with this priority in mind, AUPO and the American Academy of Ophthalmology (AAO) have joined forces to provide two informative symposia focused on resident education. These symposia, which will be held on Thursday 8:00 AM – 11:00 AM and Friday 7:50 AM – 10:15 AM, artfully integrate many experts and are led by Nicholas Volpe and Thomas Oetting. Thursday's symposium, **Educating Ophthalmologists for the Future: Predicting the Future** and Friday's symposium, **Educating Ophthalmologists for the Future: Debating the Details**, will use an interactive format, to engage all participants in a discussion that we hope will lead to a consensus paper to guide us into the future as academic institutions. Scott Cousins and Russell Van Gelder have organized an outstanding research symposium, **Big Data and Ophthalmology**, on Saturday 8:00 AM - 9:45 AM. The presentations will discuss the use and management of "big data" in research. The popular **Breakfast with Colleagues** moderated by Nicholas Volpe promises a new level of interaction on critical issues facing members

and associate members. We always look forward to the outstanding program on education highlighted by the AUPO/AAO-sponsored **Straatsma Award for Excellence in Resident Education** and are pleased to introduce the new AUPO/AAO-sponsored **Award for Excellence in Medical Student Education**. The **Resident and Fellow Research Forum** co-sponsored by Research to Prevent Blindness will feature the creativity of our academic progeny. The meeting will wind up with the informative and practical workshops.

AUPO is unique in its representation of all aspects of academic ophthalmology. If you are already involved in the organization please continue your critical support. If you would like to become more involved, talk to a member of the Board of Trustees or our new Executive Vice President, **Steve Feldon**.

This was Bart Mondino's last year as EVP, and all of us at AUPO owe him a special debt of gratitude for his leadership, devotion, grace, and good humor. He has taken our organization to a new level of performance and relevance. Please take a moment to thank him for all he has done.

Eduardo C. Alfonso, MD
President, AUPO

RESEARCH TO PREVENT BLINDNESS (RPB)

Research to Prevent Blindness (RPB) seeks to preserve and restore vision by supporting research to develop treatments, preventives and cures for all conditions that damage and destroy sight. Within this mission is a commitment to grow and nurture a robust and diverse vision research community. Since it was founded in 1960, RPB has awarded hundreds of millions of dollars in research grants to the most talented vision scientists at the nation's leading medical schools. RPB flexible grants foster groundbreaking findings by giving researchers the freedom to pursue emerging discoveries mid-study. As a result, RPB has been associated with nearly every major breakthrough in the understanding and treatment of vision loss in the past 50 years. In addition to its critical grant support for departments of ophthalmology and individual researchers, RPB is a major contributor to the AUPO. Visit www.rpbusa.org.

FIGHT FOR SIGHT

Since 1946, Fight for Sight (FFS) has supported and inspired eye and vision research by funding promising scientists early in their careers. Application deadline for all grants is November 15. Please visit www.fightforsight.org to apply.

SUMMER STUDENT FELLOWSHIPS: Summer Student Fellowships are available to undergraduates, graduate and medical students interested in pursuing ophthalmology related clinical or basic research. For most students, this is their first exposure to eye or vision research and the experience has resulted in many students choosing academic ophthalmology and/or eye research as a full-time career. Awards of \$2,500 are given for 2-3 months of full-time research, usually during June through August.

POSTDOCTORAL AWARDS: Post-Doctoral Awards support individuals with a doctorate (PhD, DrPH, MD, OD or DVM) who are interested in academic careers in basic or clinical research in ophthalmology, vision or related sciences. This funding is intended to offer those interested in an academic career the opportunity to spend a year engaged in vision and eye research under the supervision of a senior scientist/clinician mentor. Residents and clinical fellows are required to spend sufficient time on the funded research project to carry out the proposed objectives while basic researchers are expected to work full-time. One year grants of \$22,500 are awarded.

GRANTS-IN-AID: Grants-in-Aid (GIA) are intended to fund pilot projects and generate preliminary results for investigators who have limited or no other research funding. GIA are awarded to junior faculty members who have received their first faculty or research appointment within the previous three years and who are developing their independent scientific skills. A majority of recipients go on to successfully compete for larger, multi-year awards from the NIH or other governmental and private sources utilizing data generated by FFS funded projects. Support may only be used for equipment, consumable supplies or technical staff salary devoted to the specific research project. One year awards of \$22,500 are provided.

AMERICAN SOCIETY OF CATARACT AND REFRACTIVE SURGERY (ASCRS)

ASCRS provides an excellent opportunity for residents and fellows to learn both fundamental skills and leading edge techniques. ASCRS leadership has made a long-term commitment to the support and education of residents and fellows in ophthalmology. In addition to its many clinical offerings, the ASCRS Annual Meeting also includes a full half-day program developed specifically for the young ophthalmologist. The program focuses on important practice aspects and provides valuable insight for those beginning a career in ophthalmology. Registration for the ASCRS/ASOA Symposium and Congress, along with Cornea Day and Glaucoma Day, is free for US residents and fellows. Each year, ASCRS hosts the largest subspecialty meeting in ophthalmology, bringing together more than 4,000 anterior segment surgeons from around the world. The 4-day meeting features papers, symposia, instructional courses, films, posters, didactic wet labs, and advanced education for glaucoma, cornea, cataract and refractive surgery.

ASCRS is an international, educational society with more than 9,000 members. Its mission is to advance the art and science of ophthalmic surgery and the knowledge and skills of ophthalmic surgeons by providing clinical and practice management education and by working with patients, government, and the medical community to promote the delivery and advancement of high-quality eye care. Since its founding in 1974, ASCRS has led the field through significant advances in technology and clinical science through its educational programs, publications and on-line resources. ASCRS has become the surgeons' primary source of up-to-date clinical information, published research, and regulatory information affecting the practice of medicine.

History of AUPO

The Association of University Professors of Ophthalmology (AUPO) was founded in 1965 by several leaders in academic ophthalmology as an organization dedicated to research and education. The mission of AUPO is to serve, strengthen, and represent departments of ophthalmology; to provide support, information, and leadership opportunities to department chairs, program directors, and other faculty members; to promote excellence in ophthalmic education; to foster vision research and to promote ethical practice and excellence in eye care in order to ensure the best possible vision for the public. As such, AUPO is the voice of academic ophthalmology.

Initially including only chairs of ophthalmology divisions or departments in medical schools, the membership was later enlarged to include members who are chairs or co-chairs of departments or divisions of ophthalmology in any institutions that sponsor accredited ophthalmology residency training programs. A category of associate membership was established for residency program directors of accredited residency training programs in ophthalmology who do not chair their department or division. Canadian chairs and their residency program directors became eligible for membership in 1996. In 2006 and 2009 respectively, research directors and medical student educators in departments or divisions of ophthalmology in medical schools or other institutions sponsoring accredited ophthalmology residency training programs, became eligible for associate membership.

Special acknowledgement is due to the continuing support that has been provided by Research to Prevent Blindness (RPB) since the creation of AUPO in 1965. In addition to a very generous unrestricted donation and the support of the AUPO/RPB Resident and Fellow Research Forum, RPB joined with AUPO to match the donation of Bernard Becker, MD, initiating the Physician-Scientist Award, which was awarded in 2001 and 2006. Without the active participation by RPB since its founding, AUPO certainly would not have reached its current level of importance.

The Straatsma Award for Excellence in Resident Education was established in 2002 by AUPO and the American Academy of Ophthalmology (Academy). Program Directors have been recognized for this award each year since its inception. In 2014 AUPO and the Academy established the Excellence in Medical Student Education Award.

The AUPO Fellowship Compliance Committee (FCC) was created in 2005 to provide training requirements for ophthalmology fellowships. It offers educational standards, protection of the public, institutions, and trainees, accountability and enforcement. To date, six ophthalmic subspecialties, supported by eight ophthalmic subspecialty societies, voluntarily participate in the compliance program. Its goals are accomplished by the following objectives: 1) Create standards for the participating subspecialties in establishing program requirements. 2) Define criteria for each participating subspecialty through the action of its own supporting organization(s), constituting standards for fellowship training including curriculum, research and clinical experience. 3) Determine initial compliance of individual fellowship programs through an application process. 4) Monitor compliance of individual fellowship programs with their subspecialty society's program requirements. 5) Monitor compliant programs on a regular review basis to assure that they remain in compliance. 6) Make compliance status publicly available so that fellowship applicants may use this information in their decision, likewise mentors will have compliance status available when advising residents on fellowship.

Straatsma Award for Excellence in Resident Education

The “Straatsma Award” was established through the generosity of the American Academy of Ophthalmology (AAO), the Association of University Professors of Ophthalmology (AUPO), and private funds to recognize and celebrate an outstanding Program Director in ophthalmology. The award carries the name and honors the accomplishments of Bradley R. Straatsma, MD, JD, former Chairman of the Department of Ophthalmology at UCLA, and former Director of the Jules Stein Eye Institute. The award is presented annually at the annual meetings of the AAO and of the AUPO. The 2014 award winner is Laura L. Wayman, MD.

Dr. Wayman completed her medical education at Mayo Medical School and her ophthalmology residency at Mayo Clinic in Rochester, Minnesota. She was in private practice as a comprehensive ophthalmologist in central Florida before joining the faculty at Vanderbilt Eye Institute in 2005. Her interest in teaching developed during residency through observation of her own program director's dedication. The hands-on practical instruction used in residency inspired her to develop curricula that involved one-on-one clinical and surgical instruction.

Her goal to improve the quality of surgical instruction led to the development of a ten week stepwise cataract surgical curriculum designed to take PGY-2 residents from wet lab to operating room. This systematic surgical exercise allows Vanderbilt Eye Institute to introduce surgical instruction earlier without compromising the quality of patient care. Another important benefit, from her perspective as a residency director, is the opportunity to develop a relationship with each resident very early in their training.

Early in her tenure at Vanderbilt Eye Institute she partnered with the Chairman, Paul Sternberg, Jr., MD to implement quality improvement strategies in the training program.

Dr. Wayman modified the Ishikawa Fishbone Diagram, a well-known quality improvement tool developed by Kaoru Ishikawa in the 1960s, to evaluate patient care by using the ACGME core competencies while considering the Institute of Medicine Aims. Incorporating the improvement component with the competency-based analysis led to a change in how Vanderbilt Eye Institute approaches system issues whether they involve medical error or resident training policies. It allows Vanderbilt Eye Institute's staff, faculty and trainees to learn from each other's experiences in a non-threatening environment while building a strong foundation for the future of ophthalmic practice through our residents.

In an effort to establish a well-rounded educational program and with the help of the faculty from the ethics division at Vanderbilt University Medical Center, Dr. Wayman developed an interactive quarterly ethics conference. Much like case presentations used for teaching differential diagnosis or clinical management, this method puts responsibility on the resident to select an appropriate case and identify the relevant ethical issue. This type of participation encourages residents and faculty to expose their ethical decision-making capacity, and therefore the educational process becomes less passive. The goal of this process is that, by exposing residents to these cases and the differing opinions of the group, they will develop reflective decision making skills that will help them succeed in their careers as ophthalmologists.

Dr. Wayman is a member of the American Academy of Ophthalmology's Committee on Resident Education, the Association of University Professors of Ophthalmology Program Director's Council, member of the ACGME's Resident Review Committee, and Chair of the Vanderbilt Eye Institute's Education Committee. She believes that building a strong educational program is accomplished through team work and a commitment to excellence.

Excellence in Medical Student Education Award

The Award for Excellence in Medical Student Education provides national recognition for an outstanding medical student educator. It was established through funding from the Association of University Professors of Ophthalmology (AUPO) and the American Academy of Ophthalmology (AAO). The award will be presented annually at the annual meetings of the AAO and of the AUPO. The inaugural award is presented to Linda Lippa, MD.

Dr. Linda Lippa graduated from the Columbia University College of Physicians and Surgeons, completed her ophthalmology residency at Albert Einstein-Montefiore, and was a Heed Fellow in Ophthalmic Pathology at the Illinois Eye & Ear Infirmary. She has held faculty positions at several universities across the country, including Wills Eye Hospital-Jefferson Medical College in Philadelphia, finally settling down in 1994 at the University of California, Irvine, where she has risen to the rank of Professor. She has won several teaching awards, including the Celebration in Teaching Award from the UCI School of Medicine. She practices comprehensive ophthalmology, teaches medical students and residents and has been director of ophthalmology medical student education for the past 17 years.

The national trend of eliminating dedicated ophthalmology clerkship time struck UCI in 2002. In response, Dr. Lippa launched a novel integrated longitudinal curriculum, embedding ophthalmology sessions in the family medicine clerkship, and lectures and correlates in courses and rotations throughout the four year medical curriculum. She built funduscopy simulators and developed a funduscopy description algorithm ("The Disc Mantra") for teaching, and for longitudinal evaluation of skills acquisition and retention. Her published data confirmed the sorry state

of student knowledge and skills, eventuating in the use of the simulators statewide as part of the clinical skills examination of the California Consortium for the Assessment of Clinical Competence.

Dr. Lippa's commitment to preserving ophthalmology education for generalists expanded; her publications have prompted educators worldwide to seek her advice. She has served as the American Academy of Ophthalmology's Representative to the Council of Academic Societies at the Association of American Medical Colleges. In that capacity, she has been able to influence clinical skills teams across the nation, identify impending changes in medical education, and devise proactive ways to integrate ophthalmology within new curricular paradigms. As a guest of Dr. Bartly Mondino at the Association of University Professors of Ophthalmology (AUPO), she organized and moderated a symposium on the crisis in medical student ophthalmology education, and assembled and headed a task force, which identified core ophthalmic competencies for graduating medical students as applied to best practices of general medicine; these core competencies were subsequently endorsed as a standard for all US medical graduates by the Boards of the AUPO and AAO. Under the auspices of the AUPO, Dr. Lippa founded a consortium of medical student educators to foster active collaboration on open access teaching tools and the sharing of strategies to preserve ophthalmology in the curriculum of member schools. In 2009, the group was formally renamed the AUPO Medical Student Educators and its members were accorded AUPO associate membership. With this infrastructure now solidly in place, Dr. Lippa looks forward to continuing to mentor and support medical student educators across the country as they strive to keep ophthalmology in the mainstream medical curriculum.

Resident and Fellow Research Forum Awards

AUPO and Research to Prevent Blindness established the Resident and Fellow Research Forum to acknowledge the importance of research in ophthalmic education. The Forum is intended to encourage the most promising house officers to pursue a career in academic ophthalmology and vision research.

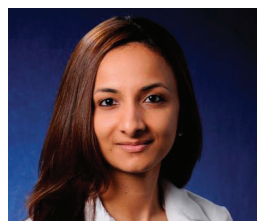

Following are the 2015 recipients:

Ana Bastos-Carvalho, MD

Ana Bastos-Carvalho was born second of four close-knit siblings in Lisbon, Portugal, but moved at an early age and lived for most of her childhood in Brazil and then Angola. From this early exposure to cultural diversity, she developed the ability to thrive in varied environments and make the most out of every experience. After medical school and a residency in Ophthalmology in Lisbon, she was admitted to the prestigious Gulbenkian/

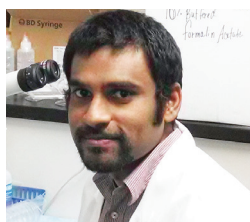

Champalimaud doctoral program for young physicians. She later joined Dr. Jayakrishna Ambati's lab in the Department of Ophthalmology and Visual Sciences, University of Kentucky, where she is currently a post-doctoral scholar. Since moving to Lexington, Ana has gone from being an ophthalmologist who could barely recognize a pipette to a prolific scientist who loves answering scientific questions. She prides herself in belonging to this quite amazing and unique team and has made significant contributions to numerous AMD projects under Dr. Ambati's guidance. Ana intends to continue developing her career as a physician-scientist and to contribute to the underdeveloped field of global/international ophthalmology.

Mehnaz Khan, MD

Dr. Khan is a third year resident in ophthalmology at the Kellogg Eye Center, University of

Michigan. She obtained her medical degree from Vanderbilt University and her undergraduate and masters' degree in Biomedical Engineering from Johns Hopkins University. Dr. Khan is involved in both clinical and basic science research. Her most recent interests lie in studying the epigenetic regulation of retinal development and its relationship to retinoblastoma, under the mentorship of Dr. Rajesh Rao. Dr. Khan hopes to pursue a career in vitreoretinal surgery.

Kabhilan Mohan, PhD

Kabhilan Mohan is a postdoctoral fellow mentored by Mark Kleinman at the University of Kentucky. He received his PhD at Iowa State University, where he was trained in ocular biology under the guidance of Sinisa Grozdanic and Randy Kardon. Here, he was involved in developing ocular biomarkers for blast-induced retinal trauma and Parkinson's disease. His current

research at Kentucky focuses on developing a novel retinal imaging technique that can enable real time visualization of critical cellular enzymes. Using mouse models, he is studying a near infrared fluorescent-labeled probe that targets caspases. He is also evaluating probes that target other molecules involved in the inflammation and cell death pathways. The overall goal for his project is to generate a library of such fluorescent probes that can be used to visualize various retinal molecular events and potentially translate into clinical settings. Kabhilan is keenly interested in the field of molecular diagnostics and in utilizing rapidly developing technology to aid progressive monitoring of retinal health. In his career, he hopes to develop such clinically relevant biomarkers targeting various retinal diseases.

Jeffrey Jing Tan, MD

Born and raised in the San Francisco Bay Area,

I majored in business administration at UC Berkeley. Knowing I wanted to go into medicine, I worked part time for a retina specialist, which confirmed my love for ophthalmology. I then moved across the country to Boston University for medical school, did my internship at Arrowhead Regional Medical Center in Southern California, and then moved to Brooklyn, NY for ophthalmology residency.

Currently chief resident at SUNY Downstate Medical Center, I am excited to begin my surgical vitreoretinal fellowship this coming July. My professional interests include retinopathy of prematurity, peripheral vitreoretinal interface abnormalities, and diabetic retinopathy. I hope to pursue a career in academic medicine where I have the opportunity to continue research as well as tackle difficult and rare clinical cases.

Basketball is my second passion in life and I am a big fan of the Golden State Warriors. My other personal interests include golf, skiing, and audiophile equipment.
